# 1 Documentation version history

The table below provides information on document version history:

## 2 Preface

The Common Data Exchange Platform (hereinafter referred as *DH Platform*) Gateway is a component enabling electricity transmission system operator (TSO) to directly access DH Platform from within their IT systems and thus helps perform their activities more efficiently.

DH Gateway provides open standards-based interfaces allowing electricity transmission system operator themselves (or with outside assistance) integrate their IT systems with DH Platform.

This document provides technical information on DH Gateway interfaces which is needed to integrate electricity transmission system operator's information systems with DH Platform.

### 3 Environments

There are two DH Gateway environments the electricity transmission system operator might access:

- “Sandbox” environment
- Production environment

Environment	Swagger Link	WEB Interface
Production	<a href="https://dh-api.eso.lt/swagger-ui.html">https://dh-api.eso.lt/swagger-ui.html</a>	<a href="https://datahub.eso.lt/">https://datahub.eso.lt/</a>
Sandbox	<a href="https://dh-sandbox-api-v2.eso.lt/swagger-ui.html#/">https://dh-sandbox-api-v2.eso.lt/swagger-ui.html#/</a>	-

## 4 Digital certificates

In both the testing and production environments of the DH Gateway component, the identity of the electricity transmission system operator is established using a TOKEN, which the electricity transmission system operator's information system must provide each time the DH Gateway network service is called.

### **To get started:**

1. The DSO responsible person sends the JWT key (JSON Web Token) to be used with each request to the DH API.
2. To make requests to the DH Gateway API - the TOKEN submission in the case of curl takes place.

## 5 Datahub Gateway API documentation

This document section describes the technical DH API documentation, which provides descriptions of API methods, request and response JSON data model structure, data validation rules, error handling, and other related information.
