# 1 Documentation version history

The table below provides information on document version history:

Version	Date	Description
1.0.0	2024-12-20	Initial document version.

**Note:** *Changes in the table marked in white are already deployed, while those marked in green will be deployed soon.*

## 2 Preface

The Common Data Exchange Platform (hereinafter referred as DH Platform) Gateway is a component enabling independent aggregator to directly access DH Platform from within their IT systems and thus helps perform their activities more efficiently.

DH Gateway provides open standards-based interfaces allowing independent aggregators themselves (or with outside assistance) integrate their IT systems with DH Platform.

This document provides technical information on DH Gateway interfaces which is needed to integrate independent aggregators' information systems with DH Platform.

### 3 Environments

There are two DataHub Gateway environments the independent aggregator might access:

- “Sandbox” environment
- Production environment

Environment	Swagger Link	WEB Interface
Sandbox	<a href="https://dh-sandbox-api-v2.eso.lt/swagger-ui.html">https://dh-sandbox-api-v2.eso.lt/swagger-ui.html</a>	-

## 4 Digital certificates

In both the testing and production environments of the DH Gateway component, the identity of the independent aggregator is established using a TOKEN, which the independent aggregator's information system must provide each time the DH Gateway network service is called.

### **To get started:**

1. The DSO responsible person sends the JWT key (JSON Web Token) to be used with each request to the DH API.
2. To make requests to the DH Gateway API - the TOKEN submission in the case of curl takes place.

## 5 DataHub Gateway API documentation

This document section describes the technical DH API documentation for aggregators, which provides descriptions of API methods, request and response JSON data model structure, data validation rules, error handling, and other related information.

### 5.1 Object controller

#### 5.1.1 POST /gateway/independent-aggregator/object/all/active/list

Resource description	
<b>Definition</b>	The method is designed to obtain a list of objects before assigning rights to the objects.
<b>Detailed description of method in API documentation for aggregators</b>	POST /gateway/independent-aggregator/object/all/active/list
<b>Request URL</b>	<a href="https://dh-sandbox-api-v2.eso.lt/swagger-ui.html">https://dh-sandbox-api-v2.eso.lt/swagger-ui.html</a>

Possible request 1	Possible response data 1
<pre>{   "meterNumber": "11111112",   "objectDataConsentSign": true,   "objectNumber": null,   "personCode": null }</pre>	<pre>[   {     "personName": "UAB testinė įmonė",     "personSurname": null,     "personCode": "202310232",     "objectNumber": "20231023",     "objectAddress": "Žiburio g. 120, Anykščiai",     "powerPlantObjectType": null,     "automationLevel": "FULL",   } ]</pre>

### 5.3.6 POST /gateway/independent-aggregator/order/report-obj-acr

Resource description

<b>Definition</b>	The method is for order a report of objects according to the granted rights.
<b>Detailed description of method in API documentation for aggregators</b>	POST /gateway/independent-aggregator/order/report-obj-acr
<b>Request URL</b>	<a href="https://dh-sandbox-api-v2.eso.lt/swagger-ui.html">https://dh-sandbox-api-v2.eso.lt/swagger-ui.html</a>

Possible request 1	Possible response data 1
<pre>{   "objectNumbers": [     "20231013"   ] }</pre>	<pre>{   "orderId": [a new Id is generated] }</pre>
Possible request 2	Possible response data 2
<pre>{   "objectNumbers": [     "20231026",     "20231027"   ] }</pre>	<pre>{   "orderId": [a new Id is generated] }</pre>

### 5.3.7 GET /gateway/independent-aggregator/order/{orderId}/report-obj-acr

Resource description	
<b>Definition</b>	The method for receive the order report "Report of objects by granted rights".

<b>Detailed description of method in API documentation for aggregators</b>	GET /gateway/independent-aggregator/order/{orderId}/report-obj-acr
<b>Request URL</b>	<a href="https://dh-sandbox-api-v2.eso.lt/swagger-ui.html">https://dh-sandbox-api-v2.eso.lt/swagger-ui.html</a>

Possible request 1	Possible response data 1

### 5.3.8 GET/gateway/independent-aggregator/order/{orderId}/count

Resource description	
<b>Definition</b>	Method which will return count (number), how many items independent aggregator will get in ordered report (reports could have more than 1 item, so it is list). It should be used when independent aggregator needs to split data in few portions. This response should be used in reports' GET methods request, where independent aggregator can provide method parameters information.
<b>Detailed description of method in API documentation for aggregators</b>	GET/gateway/independent-aggregator/order/{orderId}/count
<b>Request URL</b>	<a href="https://dh-sandbox-api-v2.eso.it/swagger-ui.html">https://dh-sandbox-api-v2.eso.it/swagger-ui.html</a>

Possible request 1	Possible response data 1
URL parameters: <ul style="list-style-type: none"> <li>orderId - 100048</li> </ul>	<pre> {   "count": 2 } </pre>
