# 1. Documentation version history

The table below provides information on document version history:

Version	Date	Description
1.0	2021-03-19	New documentation format. From now on, all data is provided only in the main description of the API.
1.0	2021-03-19	Updated JSON specification of POST /reports/accounting-data-pack-b2c?first={integer}?count={integer} method. Added new fields. Mocking data will be shared after deployment.
1.0	2021-03-19	Updated JSON specification of POST /reports/accounting-data-pack-b2b-meters-level method. Added new fields. Mocking data will be shared after deployment.
1.1	2021-03-23	Added new version of method: <ul style="list-style-type: none"> <li>GET /gateway/supplier/v3/get-declaration-data?first={integer}&amp;count={integer}&amp;customerId={string}&amp;objectNumber={string}</li> </ul>
<del>1.2</del>	<del>2021-05-10</del>	<del>(will be deployed in next sprint) Rename "contractType" to "contractModel" and added new json fields: "clientName", "contractType", "currentSupplierType" in:</del> <ul style="list-style-type: none"> <li><del>Method client objects information</del></li> </ul>
1.3	2021-09-02	(will be deployed in next sprint) Added contract data controller.
1.4	2021-09-20	(will be deployed in next sprint) Added contract termination data controller.
1.5	2021-10-08	Added supplier change notification v2 controller
1.6	2021-10-15	The structure of the sample data has been changed to json format (contract termination data controller, supplier change notification v2 controller).
1.7	2021-10-27	Added new json fields: "noCoowner", "ntGetCoownerConsent", "coownerConsentDate" in: <ul style="list-style-type: none"> <li>Method contract-termination-details (possible response data)</li> <li>Method contract-termination-notification (possible request)</li> </ul>
1.8	2021-11-29	The structure of the sample data has been changed to json format: <ul style="list-style-type: none"> <li>contract change notification controller</li> </ul>

Version	Date	Description
1.9	2021-12-14	Added the new contract object controller
2.0	2021-12-14	Added the new tariff plan change notification controller
2.1	2021-12-22	Added the new contract list controller
2.2	2021-12-22	Added the new contact change notification controller
2.3	2021-12-22	Added the new order controller
2.4	2022-01-24	<ul style="list-style-type: none"> <li>Added the new sandbox method: „POST /gateway/object/all/active/list?first={ integer }&amp;count={ integer }&amp;sortKey={ string }&amp;sortOrder={ ASC/DSC }“</li> <li>Changed the controller name from “Contract object controller” into “Object controller”</li> <li>Changed url from “POST /gateway/contract-object/list?first={ integer }&amp;count={ integer }&amp;sortKey={ string }&amp;sortOrder={ ASC/DSC }” into “POST /gateway/object/my/active/list?first={ integer }&amp;count={ integer }&amp;sortKey={ string }&amp;sortOrder={ ASC/DSC }”</li> </ul>
2.5	2022-01-24	<p>Changed „Tariff plan change notification controller“ into „Notification contract tariff plan controller“</p> <p>Changed URL in the Notification contract tariff plan controller:</p> <ul style="list-style-type: none"> <li>POST /gateway/notification/contract/tariff-plan/list?first={ integer }&amp;count={ integer }&amp;sortKey={ string }&amp;sortOrder={ ASC/DSC }</li> <li>POST /gateway/notification/contract/tariff-plan</li> <li>POST /gateway/notification/{ notificationId }/contract/tariff-plan/cancel</li> </ul> <p>Changed „Contact change notification controller“ into „Notification contract contact controller“</p> <p>Changed URL in the Notification contract contact controller:</p> <ul style="list-style-type: none"> <li>POST /gateway/notification/contract/contact/list?first={ integer }&amp;count={ integer }&amp;sortKey={ string }&amp;sortOrder={ ASC/DSC }</li> <li>POST /gateway/notification/contract/contact</li> <li>POST /gateway/notification/{ notificationId }/contract/contact/cancel</li> </ul>

Version	Date	Description
2.6	2022-01-24	<p>Changed „Contract termination notification controller“ into „Notification contract termination controller“.</p> <p>Changed URL in the Notification contract termination controller:</p> <ul style="list-style-type: none"> <li>• POST /gateway/notification/contract/termination/list?first={integer}&amp;count={integer}&amp;sortOrder={ASC/DSC}</li> <li>• POST /gateway/notification/contract/termination</li> <li>• POST /gateway/notification/{notificationId}/contract/termination/cancel</li> </ul>
2.7	2022-01-24	<p>Added new controller “Notification contract controller”.</p> <ul style="list-style-type: none"> <li>▪ Methods in this controller are very similar to method in controller „Contract change notification controller“.</li> <li>▪ Note: The controller “Contract change notification controller” and its methods will be eliminated after “Notification contract controller” implementation date + 6 months.</li> </ul>
2.8	2022-01-28	<p>Removed controller and its methods “Supplier change notification v2 controller”.</p> <p>It has not yet been implemented, only a change in the documentation.</p>
2.9	2022-01-31	<p>Added errorType in method:</p> <ul style="list-style-type: none"> <li>• POST /gateway/notification/contract/termination/list?first={integer}&amp;count={integer}&amp;sortOrder={ASC/DSC}</li> </ul>
3.0	2022-01-31	<p>Added errorType in method:</p> <ul style="list-style-type: none"> <li>• POST /gateway/notification/contract/list?first={integer}&amp;count={integer}&amp;sortOrder={ASC/DSC}</li> </ul>
3.1	2022-03-09	<p>Added method:</p> <ul style="list-style-type: none"> <li>• POST /gateway/declaration/reading/list</li> </ul>
3.2	2022-03-09	<p>Prepared methods for 2s2s report:</p> <ul style="list-style-type: none"> <li>• Method POST/gateway/order/list</li> <li>• Method POST/gateway/order/{orderShortName}</li> <li>• Method GET/gateway/order/{orderId}/2s2s</li> <li>• Method GET/gateway/order/{orderId}/{orderShortName}/count</li> </ul>
3.3	2022-03-14	<p>Prepared methods for 2s2s report:</p> <ul style="list-style-type: none"> <li>• Method POST/gateway/order/list</li> <li>• Method POST/gateway/order/{orderShortName}</li> </ul>

Version	Date	Description
		<ul style="list-style-type: none"> <li>Method GET/gateway/order/{orderId}/2s2s</li> </ul>
3.4	2022-03-23	Prepared a few methods for hr-object and hr-meter reports: <ul style="list-style-type: none"> <li>POST/gateway/order/{hrOrderShortName};</li> <li>POST/gateway/order/list</li> </ul>
3.5	2022-04-12	Prepared methods for report-obj: <ul style="list-style-type: none"> <li>GET/gateway/order/{orderId}/report – obj</li> <li>POST/gateway/order/list?first={integer}&amp;count={integer}&amp;sortKey={string}&amp;sortOrder={ASC/DSC} – request 5, response 5</li> <li>POST/gateway/order/{orderShortName} – request 2, response 2</li> </ul>

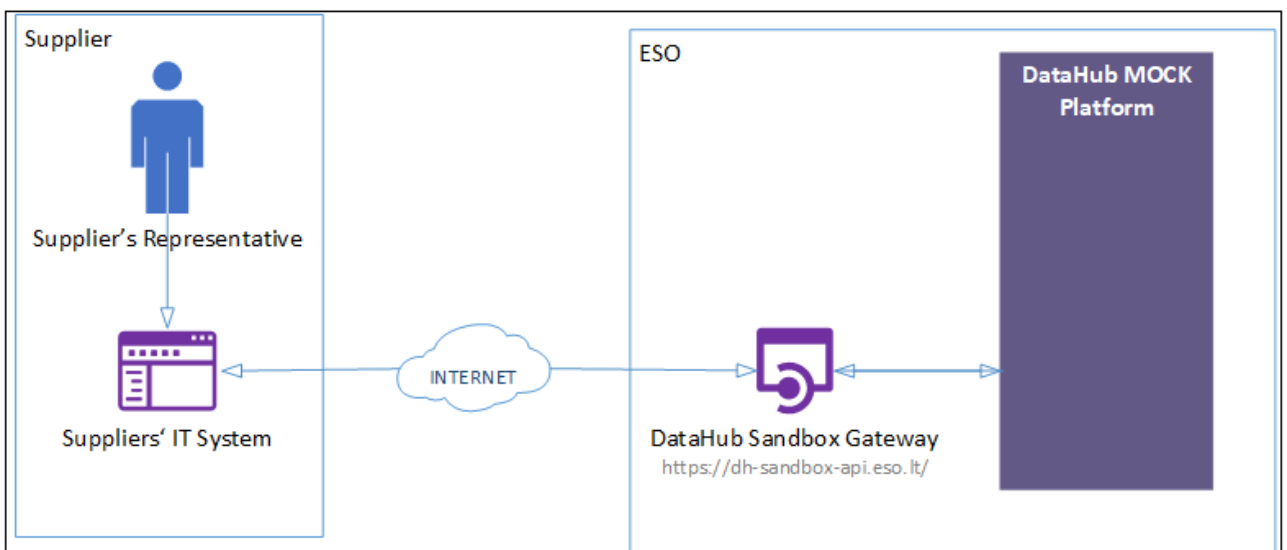

## 2. Preface

The Common Data Exchange Platform (hereinafter referred as *DH Platform*) Gateway is a component enabling independent electricity suppliers to directly access DH Platform from within their IT systems and thus helps automate the following business processes:

- Obtaining electricity consumption history data with the purpose of providing commercial proposals for the potential clients – residential and industrial electricity consumers
- Providing information to Distribution System Operator about the new contracts with the clients who have switched their supplier

DH Gateway provides open standards-based interfaces allowing independent suppliers themselves (or with outside assistance) integrate their IT systems with DH Platform.

This document provides technical information on DH Gateway interfaces which is needed to integrate suppliers' information systems with DH Platform.

### 3. Environments

There are two DataHub Gateway environments the supplier might access:

- “Sandbox” environment
- Production environment

DataHub Sandbox environment made of Mock API Gateway with mock requests and responses (scenarios). There are no connection to database or any data source, all possible requests and answers are hard-coded into mock API source code and has no any data selection logic or rules. This data is real depersonalized data from DSO customers. Sandbox requests and responses scenarios will be provided in additional document and it should be used just for preparation to integrate with DataHub production API environment or testing purposes.

Environment	Link	Swagger Link	WEB Interface
Sandbox	<a href="https://dh-sandbox-api.eso.lt">https://dh-sandbox-api.eso.lt</a>	<a href="https://dh-sandbox-api.eso.lt/swagger-ui.html">https://dh-sandbox-api.eso.lt/swagger-ui.html</a>	-

### 4. Suppliers digital certifications

In both the testing and production environments of the DH Gateway component, the identity of the supplier is established using a TOKEN, which the supplier's information system must provide each time the DH Gateway network service is called.

#### To get started:

1. The DSO responsible person sends the JWT key (JSON Web Token) to be used with each request to the DH API.
2. To make requests to the DataHub Gateway API - the TOKEN submission in the case of cUrl takes place.

### 5. Mocking scenarios

#### 5.1 Supplier change notification

If Supplier would like to send supplier change notification, its need to know all customer data (like object numbers, personal code or customer code, etc.). To get client data supplier can call method *"/supplier/client/client-objects-information"*, for example provide clientId: 89876543210 (see possible request and response data no.3) and will get response list of this client object numbers and its information. This method response data can be used in *"/supplier/v2/supplier-change-notifications"* method (see possible request data) to send message to DSO, that supplier has signed agreement with mentioned client.

Supplier change notification can be cancel in one hour. In our scenario we say, that this message is "fresh" and still 1 hour did not pass, so message still can be canceled. If supplier call *"/supplier/cancel-supplier-change-notifications"* and provide message ID number which was provided with *"/supplier/client/client-objects-information"* response, when message will be canceled and DSO will not register this agreement.

## 5.2 Client object information

If supplier don't know all required client data for supplier change notification or other purposes, supplier can call method "supplier/client/client-objects-information" and provide one of the parameters which is known: "clientId", "customerId" or "objectNumber". The response will provide all object information like object numbers, addresses, client personal or company codes and so on. Please see possible requests and response data examples near method description below.

## 5.3 Access rights controller

Access rights controller methods can be used by supplier to provide access rights for client objects for historical data download. In this controller there is 3 methods and possible request and response data:

- *POST "/client/data-access-rights"* - method to provide access rights for client objects if supplier has client agreement;
- *GET "/client/granted-objects"* - method will return a list with all access rights which was provided to the supplier by the supplier it self or by the client;
- *POST "/client/data-access-rights/delete"* - method to delete access right from the list. Supplier can delete only access right which was provided by it self, but can not delete access rights which was provided by the client;

Please see possible requests and response data examples near methods descriptions below. In possible mock request examples there are provided two client permissions, one was provided by the supplier another by the client. So only one of the access right can be removed which was provided by the supplier.

## 5.4 Data Order controller

This controller has two methods:

- *POST "/data/data-orders"* - to order historical client data. It can be done if supplier has access right to do that;
- *GET "/data/data-orders/{orderId}/data"* - method to download client data by providing order ID.

Please see possible requests and response data examples near methods descriptions below.

# 6. DataHub Gateway API documentation

This document section describes the technical DataHub api documentation, which provides descriptions of API methods, request and response JSON data model structure, data validation rules, error handling, and other related information.

## 6.1 Declaration controller

Declaration controller provides information about API methods intended for objects non smart meters data declaration amount for DSO.

### 6.1.1 Method get-declaration-data (v2)

Resource description	
<b>Definition</b>	The supplier receives data on the latest known meter scale consumption of its customers objects.

<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">GET /gateway/supplier/v2/get-declaration-data?first={integer}&amp;count={integer}&amp;customerId={string}&amp;objectNumber={string}</a>
<b>Request URL</b>	<a href="https://dh-sandbox-api.eso.lt/gateway/supplier/v2/get-declaration-data?first={integer}&amp;count={integer}&amp;customerId={string}&amp;objectNumber={string}">https://dh-sandbox-api.eso.lt/gateway/supplier/v2/get-declaration-data?first={integer}&amp;count={integer}&amp;customerId={string}&amp;objectNumber={string}</a>

## Possible request for GET declaration data (B2C)

<b>customerId</b>	<b>objectNbr</b>
10888891	12888800
10777789	12777789

## Possible response data

<b>clientId</b>	<b>customerId</b>	<b>clientName</b>	<b>readings[].objectNumber</b>	<b>readings[].objectAddress</b>	<b>readings[].counterNumber</b>	<b>readings[].scaleMaxchar</b>	<b>readings[].conversionPoss</b>	<b>readings[].scales[] . scaleId</b>	<b>readings[].scales[] . scaleType</b>	<b>readings[].scales[] . readingFromData</b>	<b>readings[].scales[] . readingMin</b>

## 6.1.4 Method send-declaration-data

Resource description	
<b>Definition</b>	The method is intended to provide readings of the scale declared by the object. The readings are given at the object level, so all counters on the full scale must be presented at the same time.
<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">POST /gateway/supplier/send-declaration-data</a>
<b>Request URL</b>	https://dh-sandbox-api.eso.lt/gateway/supplier/send-declaration-data

### Possible request data

The declaration sandbox solution is implemented in such a way that the supplier can use all the data received in the "GET declaration data" method response (provided above) and try to declare or receive one of the error messages.

### Possible response data

In success POST declaration data method call, it should provide 201 Created status. In unsuccessful request it should be provided one of the possible error code which are provided above.

## 6.2 Supplier change notification controller

### 6.2.1 Method supplier-change-notifications

Resource description	
<b>Definition</b>	The supplier submits notifications on the contracts concluded by the supplier with customers (when changing the supplier).
<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">POST /supplier/v2/supplier-change-notifications (new)</a>
<b>Request URL</b>	https://dh-sandbox-api.eso.lt/mock/supplier/v2/supplier-change-notification

### Possible request for supplier change notification

clientId	consumer Code	contractNo	contractStart	objectCodes[].code	objectCodes[].contractType	clientPermission
89876543210	null	CN00001	2020-11-01	60000, 70000	TYPE_BSS	Yes, I confirm that I have the

						customer's consent to use the data.
<b>Possible response data</b>						
<b>id</b>						
001						

## 6.2.2 Method cancel-supplier-change-notifications

<b>Resource description</b>	
<b>Definition</b>	The supplier submits cancellation of notifications on the contracts concluded by the supplier with customers.
<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">POST /supplier/cancel-supplier-change-notification</a>
<b>Request URL</b>	https://dh-sandbox-api.eso.lt/mock/supplier/cancel-supplier-change-notification

<b>Possible request for supplier change notification</b>	
<b>id</b>	
001	
<b>Possible response data</b>	
If the request is successful, an <b>HTTP 201 Created</b> message is returned	

## 6.2.3 Method client-objects-information

<b>Resource description</b>	
<b>Definition</b>	Method to find new or existing client information. This method is providing client information which can be used when calling supplier change notification method.
<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">POST /supplier/client/client-objects-information (new)</a>
<b>Request URL</b>	https://dh-sandbox-api.eso.lt/mock/client/client-object-information

<b>Possible Request 1 for method</b>			
<b>clientId</b>	<b>customerId</b>	<b>objectNumber</b>	<b>clientPermission</b>

798765432	null	null	I confirm that the consent of the specified person / company has been obtained to see the data of the list of objects belonging to him (customer code, object number, object address and current contract model)
null	11111	null	I confirm that the consent of the specified person / company has been obtained to see the data of the list of objects belonging to him (customer code, object number, object address and current contract model)
null	null	40000	I confirm that the consent of the specified person / company has been obtained to see the data of the list of objects belonging to him (customer code, object number, object address and current contract model)
798765432	11111	40000	I confirm that the consent of the specified person / company has been obtained to see the data of the list of objects belonging to him (customer code, object number, object address and current contract model)

**Possible Response 1 for method**

## 6.3 Access rights controller

### 6.3.1 Method data-access-rights

Resource description	
<b>Definition</b>	The supplier can grant rights by his self to access clients historical data if has client agreement.

	Using this API method, the vendor grants itself the right to access the historical data of the client objects on behalf of the customer. Once the rights have been granted, the supplier can download the customer's historical data for a certain period of time and, on that basis, offer the customer a contract.
<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">POST /client/data-access-rights (new)</a>
<b>Request URL</b>	https://dh-sandbox-api.eso.lt/mock/client/data-access-rights

Note: first client is a company, second is household.

<b>Possible Request for method</b>							
No.	objectNumber	customerId	expires	contactEmail	contactPhone	contactNotes	clientPermission
1	60000	22222	2021-08-20	company@domain.com	+3705123456	Contact me by phone.	I confirm that the consent of the specified person / company to receive and process personal / company data has been obtained (person's name, surname / company name, person / company code, address, contact details, facility and electricity consumption data).
2	40000	79876543210	2020-11-01	<u>Vardenis Pavardenis4@gmail.com</u>	+37066699999	Test Note	I confirm that the consent of the specified person / company to receive and process personal / company data has been obtained (person's name, surname / company name, person / company code, address, contact details, facility and electricity consumption data).
<b>Possible Response for method</b>							
1	If the request is successful, an <b>HTTP 201 Created</b> message is returned						
2	if the request is not successful, one of the error will occur.						

### 6.3.2 Method granted-objects

Resource description	
<b>Definition</b>	The supplier can get a list of all customers who have granted the rights to the objects.
<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">GET /client/granted-objects?first={integer}&amp;count={integer}&amp;sort={ASC/DSC} (new)</a>
<b>Request URL</b>	<a href="https://dh-sandbox-api.eso.lt/mock/client/granted-objects?first={integer}&amp;count={integer}&amp;sort={ASC/DSC}">https://dh-sandbox-api.eso.lt/mock/client/granted-objects?first={integer}&amp;count={integer}&amp;sort={ASC/DSC}</a>

Possible Request for granted objects method		
first	count	sort
0	2	DSC

Possible Response data /gateway/notification/contract

### 6.3.3 Method data-access-rights/delete

Resource description	
<b>Definition</b>	The supplier may remove the rights granted to him. He granted the rights himself with the client's permission, or the rights were granted to him by the client through ESO-S. The supplier can remove remove on rights which was granted by himself.
<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">POST /client/data-access-rights/delete (new)</a>
<b>Request URL</b>	<a href="https://dh-sandbox-api.eso.lt/mock/client/data-access-rights/delete">https://dh-sandbox-api.eso.lt/mock/client/data-access-rights/delete</a>

Possible Request for method		
No.	customerId	objectNumber
1	22222	60000
2	11111	
3	11111	60000

*Note: if You try to send first request You will get response 204. If You post second request You will get second error, if You post third request, You will get first error.*

## 6.4 Data orders controller

### 6.4.1 Method data-orders

Resource description	
<b>Definition</b>	The supplier can request the customer's historical object consumption data, which can consist of 4 files (objektai.csv, suminiai.csv, valandiniai.csv ir sutikimai.csv)
<b>Sample file</b>	See sample file content below.
<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">POST /data/data-orders</a>

<b>Request URL</b>	https://dh-sandbox-api.eso.lt/mock/data/data-orders
--------------------	---

Note: first client is a company, second is household.

Possible Request for method						
includeAllObjects	includeHourlyReadings	includeSummaryReadings	code	consumerCode	periodEnd	periodStart
true	true	true	40000,60000	11111,2222	2020-09	2018-10
Possible Response for method						
orderId						
50241						

#### 6.4.2 Method data-orders/{orderId}/data

Resource description	
<b>Definition</b>	When calling POST /data/data-orders method, supplier get response with <i>orderId</i> which is used calling GET /data/data-orders/{orderId}/data method to download historical clients consumption data in ZIP file format.
<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">GET /data/data-orders/{orderId}/data</a>
<b>Request URL</b>	https://dh-sandbox-api.eso.lt/mock/data/data-orders/ <u>{orderId}</u> /data

#### Possible Request for method

**orderId**/data/data-orders/50241/data

#### Possible Response for method

[50241.zip](#)

HTTP response body contains ZIP format file containing collected data (see *Contents of 50241.zip content*, below).

Name

-  Objektai 50241 [2018-10 - 2020-09] 2020-09-23 08 42 55.csv
-  Suminiai 50241 [2018-10 - 2020-09] 2020-09-23 08 42 57.csv
-  Sutikimai 50241 [2018-10 - 2020-09] 2020-09-23 08 44 19.csv
-  Valandiniai 50241 [2018-10 - 2020-09] 2020-09-23 08 44 19.csv

## 6.5 Report controller

### 6.5.1 Method accounting-data-pack-b2c

Resource description	
<b>Definition</b>	Report which will return accounting data in meters level for Household customers. If household client object has two meters, this method will return list of two items.
<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">POST /reports/accounting-data-pack-b2c?first={integer}&amp;count={integer}</a> . Response description are provided in additional document - <a href="https://www.eso.lt/lt/duomenu-mainu-platforma/dokumentai.html">https://www.eso.lt/lt/duomenu-mainu-platforma/dokumentai.html</a> .
<b>Request URL</b>	<a href="https://dh-sandbox-api.eso.lt/mock/reports/accounting-data-pack-b2c?first={integer}&amp;count={integer}">https://dh-sandbox-api.eso.lt/mock/reports/accounting-data-pack-b2c?first={integer}&amp;count={integer}</a>

### 6.5.2 Method accounting-data-pack-b2c-count

Resource description	
<b>Definition</b>	Method which will return count (number), how many items Supplier will get in „POST /reports/accounting-data-pack-b2c“ report (reports could have more than 1 item, so it is List). It should be used when supplier need to split data in few portions. This response should be used in „POST /reports/accounting-data-pack-b2c“ method request, where Supplier can provide method parameters information.
<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">POST /reports/accounting-data-pack-b2c-count</a>
<b>Request URL</b>	<a href="https://dh-sandbox-api.eso.lt/mock/reports/accounting-data-pack-b2c-count">https://dh-sandbox-api.eso.lt/mock/reports/accounting-data-pack-b2c-count</a>

### 6.5.3 Method accounting-data-pack-b2b

Resource description	
<b>Definition</b>	Report which will return accounting data in object level for Business clients. If object has 2 meters, this report will return counted data (sum of meters information which includes sum of scale consumption amounts and sum of amounts to pay for).
<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">POST /reports/accounting-data-pack-b2b?first={integer}&amp;count={integer}</a> Response description are provided in additional document - <a href="https://www.eso.lt/lt/duomenu-mainu-platforma/dokumentai.html">https://www.eso.lt/lt/duomenu-mainu-platforma/dokumentai.html</a> .
<b>Request URL</b>	<a href="https://dh-sandbox-api.eso.lt/mock/reports/accounting-data-pack-b2b?first={integer}&amp;count={integer}">https://dh-sandbox-api.eso.lt/mock/reports/accounting-data-pack-b2b?first={integer}&amp;count={integer}</a>

#### 6.5.4 Method accounting-data-pack-b2b-count

Resource description	
<b>Definition</b>	Method which will return count (number), how many items Supplier will get in „POST /reports/accounting-data-pack-b2b“ report (reports could have more than 1 item, so it is List). It should be used when supplier need to split data in few portions. This response should be used in „POST /reports/accounting-data-pack-b2b“ method request, where Supplier can provide method parameters information.
<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">POST /reports/accounting-data-pack-b2b-count</a>
<b>Request URL</b>	<a href="https://dh-sandbox-api.eso.lt/mock/reports/accounting-data-pack-b2b-count">https://dh-sandbox-api.eso.lt/mock/reports/accounting-data-pack-b2b-count</a>

#### 6.5.5 Method accounting-data-pack-b2b-meters-level

Resource description	
<b>Definition</b>	Report which will return accounting data in meter level for Business clients. If business client object has two meters, this method will return list of two items.
<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">POST /reports/accounting-data-pack-b2b-meters-level?first={integer}&amp;count={integer}</a> Response description are provided in additional document - <a href="https://www.eso.lt/lt/duomenu-mainu-platforma/dokumentai.html">https://www.eso.lt/lt/duomenu-mainu-platforma/dokumentai.html</a> .
<b>Request URL</b>	<a href="https://dh-sandbox-api.eso.lt/mock/reports/accounting-data-pack-b2b-meters-level?first={integer}&amp;count={integer}">https://dh-sandbox-api.eso.lt/mock/reports/accounting-data-pack-b2b-meters-level?first={integer}&amp;count={integer}</a>

#### 6.5.6 Method accounting-data-pack-b2b-meters-level-count

Resource description	
<b>Definition</b>	Method which will return count (number), how many items Supplier will get in „POST /reports/accounting-data-pack-b2b-meters-level“ report (reports could have more than 1 item, so it is List). It should be used when supplier need to split data in few portions. This response should be used in „POST /reports/accounting-data-pack-b2b-meters-level“ method request, where Supplier can provide method parameters information.
<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">POST /reports/accounting-data-pack-b2b-meters-level-count</a>

<b>Request URL</b>	<a href="https://dh-sandbox-api.eso.lt/mock/reports/accounting-data-pack-b2b-meters-level-count">https://dh-sandbox-api.eso.lt/mock/reports/accounting-data-pack-b2b-meters-level-count</a>
--------------------	---

### 6.5.7 Method objects-data-pack

<b>Resource description</b>	
<b>Definition</b>	Report which will return object information for both Business or Household customer.
<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">POST /reports/objects-data-pack?first={integer}&amp;count={integer}</a> Response description are provided in additional document - <a href="https://www.eso.lt/lt/duomenu-mainu-platforma/dokumentai.html">https://www.eso.lt/lt/duomenu-mainu-platforma/dokumentai.html</a> .
<b>Request URL</b>	<a href="https://dh-sandbox-api.eso.lt/mock/reports/objects-data-pack?first={integer}&amp;count={integer}">https://dh-sandbox-api.eso.lt/mock/reports/objects-data-pack?first={integer}&amp;count={integer}</a>

### 6.5.8 Method objects-data-pack-count

<b>Resource description</b>	
<b>Definition</b>	Method which will return count (number), how many items Supplier will get in „POST /reports/objects-data-pack“ report (reports could have more than 1 item, so it is List). It should be used when supplier need to split data in few portions. This response should be used in „POST /reports/objects-data-pack“ method request, where Supplier can provide method parameters information.
<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">POST /reports/objects-data-pack-count</a>
<b>Request URL</b>	<a href="https://dh-sandbox-api.eso.lt/mock/reports/objects-data-pack-count">https://dh-sandbox-api.eso.lt/mock/reports/objects-data-pack-count</a>

## 6.6 Object controller

### 6.6.1 Method POST /gateway/object/my/active/list

Resource description	
<b>Definition</b>	The method is designed to obtain a list of valid objects in the contract according to the selection criteria. The method will be used before performing: <ul style="list-style-type: none"><li>- owner change process</li><li>- contract termination process</li><li>- tariff plan change process</li></ul>
<b>Detailed description of method in API documentation (ENG)</b>	POST /gateway/object/my/active/list?first={integer}&count={integer}&sortKey={string}&sortOrder={ASC/DSC} Response description are provided in additional document - <a href="https://www.eso.lt/lt/duomenu-mainu-platforma/dokumentai.html">https://www.eso.lt/lt/duomenu-mainu-platforma/dokumentai.html</a> .

### 6.12.7 Method GET/gateway/order/{orderId}/report-obj

Resource description	
<b>Definition</b>	The method is used to obtain objects report data.
<b>Detailed description of method in API documentation (ENG)</b>	GET/gateway/order/{orderId}/report - obj
<b>Request URL</b>	<a href="https://dh-sandbox-api-v2.eso.lt/swagger-ui.html">https://dh-sandbox-api-v2.eso.lt/swagger-ui.html</a>

Possible request	Possible response
<pre>{   "orderId": "100010" }</pre>	Possible response is submitted in the .csv file of the report

### 6.12.8 Method GET/gateway/order/{orderId}/count

Resource description	
<b>Definition</b>	Method which will return count (number), how many items Supplier will get in ordered report (reports could have more than 1 item, so it is List). It should be used when supplier need to split data in few portions. This response should be used in reports' GET methods request, where Supplier can provide method parameters information.
<b>Detailed description of method in API documentation (ENG)</b>	GET/gateway/order/{orderId}/count
<b>Request URL</b>	<a href="https://dh-sandbox-api-v2.eso.lt/swagger-ui.html">https://dh-sandbox-api-v2.eso.lt/swagger-ui.html</a>

## 6.13 Contract change notification controller - old

### 6.13.1 Method object-list

Resource description	
<b>Definition</b>	Metodas skirtas gauti objektų sąrašą pagal atrankos kriterijus.

<b>Detailed description of method in API documentation (ENG)</b>	<a href="#">GET /gateway/contract-data/{changeType}/objects-list?first={integer}&amp;count={integer}&amp;sort={ASC/DSC}</a>  Response description are provided in additional document - <a href="https://www.eso.lt/lt/duomenu-mainu-platforma/dokumentai.html">https://www.eso.lt/lt/duomenu-mainu-platforma/dokumentai.html</a> .
<b>Request URL</b>	<a href="https://dh-sandbox-api-v2.eso.lt/swagger-ui.html">https://dh-sandbox-api-v2.eso.lt/swagger-ui.html</a>
